Career Summary

MCA final-year student with a strong foundation in Java, Web Development, SQL, Data Structure, OOPs, DBMS, Operating Systems, Computer Networks and SDLC concepts. Skilled in building web applications, database management, and problem-solving with hands-on experience through academic and personal projects. Passionate about learning new technologies and seeking an opportunity to contribute technical skills while growing as a software developer.

Education

Galgotias University <i>Master of Computer Applications (MCA)</i>	2024 – 2026
Birla Institute of Technology Mesra, Ranchi <i>Bachelor of Computer Applications (BCA)</i>	2021 – 2024
Ursuline Intermediate College Ranchi <i>Intermediate (12th)</i>	2021
S.S Doranda Girls High School <i>High School (10th)</i>	2019

Technical Skills

Languages: Java, JavaScript, SQL

Core CS Concepts: DSA, OOps, DBMS, Operating Systems, Computer Networks, SDLC

Web Technologies: HTML, CSS, React, Node.js, Express.js

Database: MySQL

Operating System: Windows, Linux (Basic)

Tools & Technologies: Git, VS Code, GitHub

Projects

AI-Powered Interview Assistant | [GitHub](#) | *Node.js, Express.js, JavaScript, HTML, CSS, Google Gemini API, REST API*

- Developed an AI-based interview simulation platform that conducts technical and HR interviews using Google Gemini API.
- Implemented real-time AI-generated interview questions, candidate response evaluation, instant feedback, and scoring out of 10.
- Designed a category-based interview system supporting Java, Python, SQL, DSA, and HR interview preparation.
- Built a responsive chat-based interface with Express.js backend for seamless communication between users and AI services.
- Integrated prompt engineering techniques to generate professional interviewer behavior and personalized feedback.

Student Management System | *Java, JDBC, MySQL, VS Code*

- Developed a console-based Student Management System using Core Java and JDBC.
- Implemented CRUD operations (Create, Read, Update, Delete) for managing student records.
- Used MySQL database for storing and retrieving data efficiently.
- Established database connectivity using JDBC for real-time data operations.
- Designed and tested the application using VS Code.

AI Resume Analyzer | *Python, Flask, Machine Learning, Scikit-learn, Pandas, pdfplumber, FPDF, HTML, CSS*

- Developed an AI-powered Resume Analyzer web application using Python and Flask to analyze resumes and provide career insights.
- Built a Machine Learning model using Scikit-learn to predict job roles based on resume content.
- Applied NLP techniques to extract key skills from PDF resumes.
- Implemented an ATS scoring system to evaluate resume quality based on skills, experience, and keywords.
- Designed a missing skill detection feature to suggest improvement areas for better job matching.
- Created a Flask-based web interface for smooth user interaction.
- Generated downloadable PDF reports containing predicted role, ATS score, and recommendations.

Agriculture Portal — Full Stack Web & Machine Learning Project | *Python, MySQL, HTML, CSS, JavaScript, Bootstrap,*

- Developed a full-stack agriculture platform using Python, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Implemented features for crop recommendation, fertilizer recommendation, rainfall prediction, and yield prediction.
- Designed a responsive web interface and integrated backend database operations.
